

REMOVING A PRIOR VERSION OF THE S5 Trade Analyzer

If you had a prior version of the S5TA, please insure you remove it completely before installing the new S5TA. To do so, follow the below:

- 1.** On the Control Center, go to File/Utilities/Remove NinjaScript Assembly. Select Stage 5 Trade Analyzer, and click Remove and then Close.
- 2.** Restart your NinjaTrader prior to reinstalling the S5TA.

There are a number of other issues which can cause issues with NinjaTrader, including corrupt instruments, corrupt database, etc. However we should be able to identify these by following the steps outlined above in the Troubleshooting manual, and if we see any of these errors, we have to direct you to NinjaTrader Technical Support first, before we attempt any repairs on your system.
